

Commissioners Corner
By Dick Scott

Just received news from the Colorado Department of Transportation that rebuilding of Highway 96 east from Sheridan Lake is forthcoming.

A letter from Paul A Westhoff states that \$2.5 million for surface treatment funds has been authorized for this reconstruction. The project will be a standard CDOT bid project to include a full depth- 16 inch deep- reconditioning of the base, followed by a 3.5 inch asphalt overlay. The project will be from Sheridan Lake approximately six miles east. The job will be advertised in July of 2011 with completion before the end of the 2011 construction season.

The commissioners sincerely appreciate CDOT's response to our concerns and it will be nice to no longer have that jolting ride over that section of Hwy 96. It would be great if all of 96 could be rebuilt but that is a long shot at this time.
